FDA Sets Meeting Date with Izotropic

VANCOUVER and SACRAMENTO, February 19, 2025, Izotropic Corporation (CSE: **IZO**) (OTCQB: **IZOZF**) (FSE: **1R3**) (“**Izotropic**” or the “**Company**”), a medical device company commercializing imaging-based products utilizing innovative and emerging technologies for the more accurate screening, diagnoses, and treatment of breast cancers, announces that the U.S. Food and Drug Administration (“**FDA**”) has set the Company’s pre-submission meeting date, further to its [January pre-submission filing](#).

The Company filed a pre-submission with the FDA on the subject of its clinical study design for the approval of its first medical imaging device, the IzoView Breast CT Imaging System (“**IzoView**”). The FDA has scheduled the pre-submission meeting for March 20, 2025.

Izotropic intends to launch IzoView with contrast-enhancement for breast cancer screening adjunctive to digital breast tomosynthesis, commonly referred to as 3D mammography, for patients with dense breast tissue. Dense breast tissue is both a risk factor for developing breast cancer and a patient characteristic that affects ~50% of the women in the U.S. Dense breast tissue makes the current standard-of-care breast cancer screening modalities less effective at detecting cancers. Contrast-enhanced breast CT has proven more than promising in research studies at UC Davis Medical Center (“**UC Davis**”) in Sacramento, California, where the technology was founded and from which Izotropic has the exclusive global licensing rights. Four successive breast CT systems have been built and tested in clinical trials for research purposes at UC Davis, funded primarily by U.S. government grants, resulting in a fully de-risked technology with a large volume of published, peer-reviewed scientific research supporting its capabilities and potential.

Izotropic is committed to its mission to bring new devices and technologies to the market and will continue to seek out opportunities to increase efficiency and expedite patient access to its products to achieve better outcomes for patients and save lives from breast cancer.

Forward-Looking Statements:

This document may contain statements that are "Forward-Looking Statements," which are based upon the current estimates, assumptions, projections, and expectations of the Company's management, business, and its knowledge of the relevant market and economic environment in

which it operates. The Company has tried, where possible, to identify such information and statements by using words such as "anticipate," "believe," "envision," "estimate," "expect," "intend," "may," "plan," "predict," "project," "target," "potential," "will," "would," "could," "should," "continue," "contemplate" and other similar expressions and derivations thereof in connection with any discussion of future events, trends or prospects or future operating or financial performance, although not all forward-looking statements contain these identifying words.

These statements are not guarantees of performance and involve risks, including those related to capital requirements and uncertainties that are difficult to control or predict, and as such, they may cause future results of the Company's activity to differ significantly from the content and implications of such statements. Forward-Looking Statements are pertinent only as of the date on which they are made, and the Company undertakes no obligation to update or revise any Forward-Looking Statements to reflect new information or the occurrence of future events or circumstances unless otherwise required to do so by law. Neither the Company nor its shareholders, officers, and consultants shall be liable for any action and the results of any action taken by any person based on the information contained herein, including, without limitation, the purchase or sale of Company securities. Nothing in this document should be deemed to be medical or other advice of any kind. All images are for illustrative purposes only. IzoView has not yet been approved or cleared for sale.
